

Advanced Technology

Extensive research and analysis was conducted by NOV Downhole to design and manufacture this impressive addition to our drilling motors product line:

- Elastomer formulation testing
- Fluid immersion testing
- Endurance testing
- Performance research
- Field testing

The results of extensive testing provided the strong base for the PowerPLUS Motor; another quality National Oilwell Varco solution for the oil and gas drilling industry.

FEATURES AND BENEFITS

Features:

- Advanced Elastomer Power Section
- Ultra-Duty Driveshaft Assembly
- Increased OD Adjustable Assembly
- Ultra-Duty Bearing Assembly Options

Benefits:

- Improved Drilling Performance (50% more power at 50% more pressure) delivering higher ROP
- Higher Torque Capacity
- 2X Stronger than Conventional Driveshaft Assemblies
- Reduced Maintenance
- Increased Reliability
